

Famille : Dégraissant

Code Tarif : 4652

Support : Vitro Céramique, induction

Vitro céramique induction

Contenance : 500 ml

TECHNICAL CHARACTERISTICS

NETTOYANT VITROCÉRAMIQUE & INDUCTION AVEL contains specific high-power degreasing agents that clean effectively while leaving behind an invisible protective film, limiting dirt adhesion. Its gentle, acid-free formula, combined with superfine polishing agents, guarantees cleaning without the risk of scratches. Used regularly, it facilitates daily maintenance and allows your hob to retain its original shine over time. Leaves no streaks.

DIRECTIONS FOR USE

1. Shake the bottle well before use.
2. Pour a small amount of product onto a sponge or a paper towel.
3. Spread uniformly over the hob.
4. Wipe with a clean, dry cloth.

ADVICE

Apply regularly, ideally after each use, on a switched-off and cold hob. For stubborn, burnt-on residue, remove it first using a MAXI-GRATTE AVEL (Ref. 4700013) to avoid any risk of scratching.

AREA OF USE

Cleans all ceramic and induction cooktops, and oven windows. Heat-resistant.
